

Business Plan

Europe's Fair Freelance Platform

2027 – 2030

1. Executive Summary

EULANCE is a European-first freelance platform connecting companies and independent professionals through a fast, fair, transparent and compliant marketplace. The platform is built around a transaction fee model — free to join for everyone, with EULANCE taking a 15% fee from the client side only when a hire successfully completes. Freelancers can expect a 5% fee on their side.

The initial launch focuses on Iberian countries, targeting digital sectors, with planned expansion into France, Germany and Italy. The rest of EU will follow. The UK, Canada, Australia and New Zealand remain future options, due to the values proximity and straightening relations in the current and future geopolitical scenario. European digital sovereignty is the goal. Keep Europe dynamic, future-oriented, prosperous, and safe.

Core principles

Freedom. Fairness. Future.

Free to join. Free to hire. EULANCE earns only when you do.

No subscriptions. No pay-to-play.

2. Market Opportunity

The European freelance market is rapidly growing, driven by digitalization, remote work and evolving workforce preferences. Millions of professionals are shifting towards flexible work models, while SMEs increasingly rely on external talent to stay competitive.

The LinkedIn model is obsolete for younger generations. Endless hours of manual profile input, privacy friction, and repetitive data entry are a relic of the past. EULANCE eliminates this entirely.

The cost of living across EU hubs is creating demand for decentralized work — reducing commutes, improving capital allocation and promoting professional fulfilment.

Europeans currently rely on overcrowded, expensive, overseas platforms. EULANCE changes that: a platform built for Europe, compliant by design, and structurally fairer to freelancers than any existing alternatives.

Region	Key Markets	Est. Freelancers	Phase
Iberian Peninsula	Portugal, Spain	1.5M+	Phase 1 — 2027
Core EU	France, Germany, Italy	4.7M+	Phase 2 — 2028
Benelux	Netherlands, Belgium, Luxembourg	900k+	Phase 3 — 2029
Nordics	Sweden, Denmark, Finland, Norway	1.1M+	Phase 3 — 2029
CEE	Poland, Czech Republic, Hungary, Romania	2.4M+	Phase 3 — 2029
Baltics	Estonia, Latvia, Lithuania	250k+	Phase 3 — 2029
Southern EU	Greece, Croatia, Bulgaria	600k+	Phase 3 — 2029
Total EU	27 member states	11.5M+	Phase 4 — 2030
Additional Markets	UK, AU&NZ and Canada	4M+	Phase 5 — TBD

3. Value Proposition

For freelancers

- Low platform fees on earnings
- Escrow payment protection — funds secured before work begins, guaranteed release on delivery. Timely and secure payments.
- EU-compliant contracts auto-generated in local language and jurisdiction
- Non-transferable reputation: reviews, verified skills, completion rate and badges
- VAT-compliant invoicing and year-end earnings reports — cross-border handled automatically
- Dispute resolution backed by the platform — only available for in-platform contracts

For companies

- Free to join and browse — no upfront cost before a single hire is made
- AI-powered best-match reduces time-to-hire dramatically
- Fully compliant contracts and invoicing across all EU jurisdictions
- Simple pricing: 15% of contract value, charged only on successful delivery
- Escrow eliminates payment risk on both sides

4. Product & Services

Feature	Description
Job marketplace	Post projects, browse profiles, filter by skill, location and availability
AI best-match	Algorithmic matching surfaces the most relevant candidates instantly
Direct messaging	Secure in-platform communication; contact details not exposed
Contract management	One-click AI-generated contracts compliant with EU law and local jurisdiction
Built-in e-signature	Legally binding digital signatures; no third-party tools required
Escrow payments	Client funds held securely and released automatically on delivery confirmation
VAT & invoicing	Automatic invoice generation with cross-border VAT / reverse charge handling
Dispute resolution	Structured mediation backed by platform support — only for in-platform contracts
Reputation system	Reviews, completion rates and verified badges
Earnings dashboard	Real-time income tracking, tax summaries and annual reports for freelancers
Express Hire (add-on)	Priority matching within 24 hours — €90 per use
AI Best Match (add-on)	AI-ranked shortlist of top 5 candidates — €15 per use

5. Business Model

Transaction fee model

EULANCE earns only when its users succeed. There are no subscriptions and no fees charged to freelancers. A double-fee scheme is expected in the long-term: 15% fee is charged to the client side and 5% to the freelancer at the point of payment release.

How a hire works

1. Client posts a project or browses freelancer profiles — free
2. Client and freelancer agree scope and rate inside EULANCE
3. Client creates a contract and deposits funds into escrow (contract + 15% fee)
4. EULANCE invests the cash in money market short-term instruments until delivery;
5. Freelancer completes work and submits for approval
6. Client approves delivery — EULANCE releases payment automatically
7. Freelancer receives 95% of agreed rate (5% fee deduction)

A visual diagram of the cash-flows of a 1000€ contract is shown below:

Party	Fee	Notes
Freelancer	5% of contract	Charged on payment release only
Client — standard	15% of contract	Charged on payment release only
Client — Pro tier	5% + €39/mo	Reduced fee, priority support, advanced analytics
Express Hire	€90 per use	Priority matching within 24 hours
AI Best Match	€15 per use	AI-ranked top 5 candidate shortlist

Anti-leakage design

The platform is designed so that transacting inside EULANCE is always more valuable than meeting *off-platform*. Key retention mechanisms:

- Escrow protection — freelancers insist on in-platform payment; off-platform means chasing invoices with no recourse
- Non-transferable reputation — review history, ratings and verified badges cannot be exported
- Auto-generated legal contracts — multilingual, EU-compliant, one click; expensive to replicate independently
- Cross-border VAT and invoicing — hours of compliance admin handled automatically
- Dispute resolution — only available for in-platform contracts

6. Expansion Plan

EULANCE expands in five structured phases, prioritizing markets by regulatory familiarity, language proximity, and freelancer density. Each phase is self-funding: Phase 1 revenue underwrites Phase 2 launch costs, and so on. Development costs are low in 2027 and an MVP and beta users are expected in 2027.

Phase 1 — 2027: Iberian Peninsula

Markets: Portugal & Spain

Freelancer population: ~1.5 million

Strategic rationale: shared language family, cultural proximity, high freelancer density in tech and creative sectors, manageable regulatory scope (2 jurisdictions)

- Freelancer-first acquisition: zero fees, strong onboarding, founding member programme
- SME outreach via trade associations, accelerators and startup communities
- First 500 freelancers receive a verified 'Founder' badge — permanent social proof
- Portuguese and Spanish contract templates live from day one
- Target: 3,500 active clients and 9,000 active freelancers by year-end

Phase 2 — 2028: Core EU

Markets: France, Germany, Italy

Freelancer population: ~4.7 million

Strategic rationale: three of the five largest EU economies; high digital freelancer demand; strong cross-border hiring with Southern EU supply base from Phase 1

- Leverage Phase 1 supply base — Portuguese and Spanish freelancers already serving French and German clients
- Localized platform: French, German and Italian language, legal templates and tax rules
- B2B direct sales to mid-market companies (50–500 employees)
- PR campaign positioning EULANCE as the European alternative to Upwork
- Target: 12,000 active clients and 32,000 active freelancers by year-end

Phase 3 and 4 — 2029/2030: Rest of EU by Region

Phase 3 completes full EU coverage across four regional clusters, sequenced by market readiness and operational complexity.

Benelux — Netherlands, Belgium, Luxembourg

- High freelancer penetration (Netherlands leads EU in self-employment rate at ~17%)
- Strong English proficiency reduces localization cost
- Belgian and Luxembourg cross-border complexity handled by existing EU contract engine

Nordics — Sweden, Denmark, Finland, Norway

- Premium market: high average contract values, strong digital sector
- High trust in digital platforms — adoption friction is low
- Norway outside EU but included for market size; minor regulatory adaptation required

CEE — Poland, Czech Republic, Hungary, Romania

- Largest untapped supply pool in the EU: 2.4M+ freelancers, growing rapidly
- Strong developer and engineering talent base — high demand from Western EU clients
- Lower average contract values offset by high volume
- Phased rollout: Poland and Czech Republic first (largest markets, best infrastructure)

Baltics & Southern EU — Estonia, Latvia, Lithuania, Greece, Croatia, Bulgaria

- Baltics: small but highly digital markets; Estonia's e-residency ecosystem is a natural fit
- Southern EU: large freelancer populations in Greece and Bulgaria with strong EU client demand
- All markets served by existing multilingual contract engine with minor local law additions

7. Financial Model (2027–2027)

Revenue is entirely transaction-fee based (15% of client-side and 5% of freelancers contract value). Projections below are base-case and broken down by phase and region. All figures in euros.

Core assumptions

Assumption	Value
Platform fee	15% of client payment + 5% Freelancers
Average contract value	€1,200
Average transactions per client/mo	1.5
Average revenue per transaction	€120 (10% of €1,200)
Freelancer fee	0% — always
Pro tier take-up	8% of active clients
Add-on (Express / AI Match) price	€15 per use
Add-on uses per 100 clients/mo	10 uses
Monthly client churn rate	5% (target <3% by 2027 with retention features)
Monthly client growth rate	8% (Phase 1), 12% (Phase 2), 10% (Phase 3)
Monthly freelancer churn	6%

Monthly freelancer growth	10% (Phase 1), 14% (Phase 2), 12% (Phase 3)
---------------------------	---

User volume projections

Region / Phase	Clients end-2027	Freelancers end-2027	Clients end-2028	Freelancers end-2028	Clients end-2027	Freelancers end-2027
Phase 1 — Iberia	3,500	9,000	8,200	22,000	12,000	33,000
Phase 2 — Core EU	—	—	5,800	16,000	14,000	40,000
Phase 3 — Benelux	—	—	—	—	3,200	9,000
Phase 3 — Nordics	—	—	—	—	2,800	7,500
Phase 3 — CEE	—	—	—	—	4,500	14,000
Phase 3 — Baltics & South	—	—	—	—	1,500	4,500
TOTAL	3,500	9,000	14,000	38,000	38,000	108,000

Revenue projections by region

Region	Revenue 2027	Revenue 2028	Revenue 2027	3-Year Total
Phase 1 — Iberia	€4.6M	€11.2M	€17.3M	€33.1M
Phase 2 — France	—	€4.1M	€9.8M	€13.9M
Phase 2 — Germany	—	€5.2M	€12.1M	€17.3M
Phase 2 — Italy	—	€3.8M	€8.9M	€12.7M
Phase 3 — Benelux	—	—	€4.6M	€4.6M
Phase 3 — Nordics	—	—	€4.9M	€4.9M
Phase 3 — CEE	—	—	€6.5M	€6.5M
Phase 3 — Baltics & South	—	—	€2.2M	€2.2M
Add-ons (all regions)	€90k	€420k	€1.4M	€1.9M

TOTAL	€4.7M	€24.8M	€67.7M	€97.2M
-------	-------	--------	--------	--------

Note: Revenue = 10% of GMV (Gross Merchandise Value). GMV is the total value of contracts processed. These are base-case projections. Bear case reduces growth rates by ~40%; bull case increases them by ~50%. Actual results depend on execution, market conditions and competitive response.

Key financial metrics by year

Metric	2027	2028	2029
Total active clients	3,500	14,000	38,000
Total active freelancers	9,000	38,000	108,000
Total monthly transactions	~5,250	~21,000	~57,000
Platform GMV (annual)	~€47M	~€248M	~€677M
Total platform revenue (10%)	~€4.7M	~€24.8M	~€67.7M
MRR (December of each year)	~€630k	~€2.9M	~€7.8M
Add-on revenue	~€90k	~€420k	~€1.4M
Avg revenue per client / month	~€112	~€148	~€148
Avg contract value	€1,200	€1,200	€1,200

Path to profitability

- Break-even estimated at ~2,500 active clients assuming €60k/month operating costs at launch scale
- EULANCE crosses break-even in Q2 2027 under base-case assumptions
- Phase 1 revenue funds Phase 2 launch: no external capital required for expansion if Phase 1 hits targets
- Phase 3 regional rollout is low marginal cost: contract engine and platform are already built; only legal localisation and marketing spend required per new market
- Target: €5M ARR exiting 2027, €25M ARR exiting 2028, €68M ARR exiting 2029

8. Operations

Launch team

Role	Responsibility
CEO / Co-founder	Strategy, partnerships, fundraising, EU regulatory relationships
CTO / Co-founder	Platform architecture, AI features, payments infrastructure, security
Head of Growth	User acquisition, referral programmes, SME and enterprise outreach
Community Manager	Freelancer onboarding, support, trust & safety, founding member programme
Legal & Compliance	EU contract templates, VAT, GDPR, cross-border labour law, per-country rollout
Localisation Manager	Language, UX and legal adaptation for each new market (Phase 2 hire)

Technology

- EU-hosted infrastructure — GDPR-compliant by design, data sovereignty guaranteed
- Escrow payments via licensed EU payment institutions
- AI matching built on open-weight models fine-tuned on European job market data
- Contract generation via LLM with jurisdiction-specific legal review per country
- Multilingual platform: PT, ES at launch; FR, DE, IT in 2028; 10+ languages by end 2027

9. Risks & Mitigation

Risk	Mitigation
Platform leakage	Escrow, reputation lock-in, legal contracts and VAT tools make on-platform transacting clearly superior
Chicken-and-egg liquidity	Freelancer-first acquisition; seed supply before demand; founding member programme builds critical mass
27-market regulatory scope	Phased expansion; dedicated compliance role; contract engine built for modularity (add jurisdiction = add template)
Competition from Upwork/Fiverr	0% freelancer fees is a structural differentiator; EU-first positioning; local trust and compliance

Payment fraud / disputes	Escrow holds funds before work starts; structured dispute resolution; identity verification at onboarding
High monthly client churn	Focus on quality matches, fast time-to-hire, sticky invoicing and contract tools; target <3% churn by 2027
Currency / FX (NOK, SEK, etc)	Stripe or Mangopay multi-currency support; local pricing displayed in local currency
GDPR / data privacy	EU-only infrastructure; privacy-by-design; DPA in place from day one; no data sold or shared

10. Vision

To become Europe's leading freelance infrastructure — redefining how professionals and companies collaborate across all 27 EU member states in a fair, transparent and sustainable way.

EULANCE is not just a marketplace. It is a commitment to the future of work: one where talent is rewarded fairly, companies hire without bureaucracy, and the platform earns only when its users succeed.

Our promise

Free to join. Simple, fair, European.

From Lisbon to Tallinn, from Helsinki to Valletta — EULANCE brings fresh air to the EU workspace.
